SUMMARY

Flutter Developer with 4 years of experience building mobile and web apps using one codebase. Skilled in creating simple and clean UI, connecting APIs, and working with Firebase and Supabase. Experienced with GetX and Bloc for state management. Focused on good performance and user-friendly apps.

EDUCATION

Gujarat Technological University Government Engineering College - Rajkot	2020 – 2024
Higher secondary school Nutan vidhyapith	2019 – 2020

EXPERIENCE

Shree Software Solution - Developed cross-platform mobile applications using Flutter - Built a responsive UI and improved app performance - Integrated REST APIs for backend communication - Fixed bugs and maintained existing applications	Sep 2023 – Present
Mtz infotech - Developed Android and iOS apps using Flutter - Worked with team to deliver user-friendly applications - Managed iOS app deployment using TestFlight - Built responsive web applications using Flutter	Jun 2022 – Sep 2023

SKILLS

Mobile Development — Flutter, Dart, Android, iOS, Cross-Platform Development, Responsive Web
Architecture & Design Patterns — Clean Architecture, MVVM, MVC, SOLID Principles, Repository Pattern, Dependency Injection
State Management — BLoC, GetX, Riverpod, Provider
Backend & Cloud — Firebase (Auth, Firestore, Cloud Functions, FCM, Analytics), Supabase, GraphQL basics, RESTful APIs
Databases — SQLite, Sqflite, Hive, Firestore, NoSQL
Tools & Technologies — Git, GitHub, GitLab, Postman, Android Studio, Xcode, Jira
Third-Party Integrations — Push Notifications, WebRTC, LiveKit SDK
AI Tools — DeepSeek AI, ChatGPT

KEY PROJECT

HelixDoc  - Complete app for clinics with patient, doctor, and admin roles - Patients can book appointments and consult doctors via video call - Doctors can manage their schedule and patient records - Integrated WebRTC for real-time video consultation - Added secure payment integration - Used Firebase for real-time data sync and notifications
Resido  - Developed a property management app for managing properties, tenants, and locations - Built complete system for property → building → floor → unit structure - Implemented role-based access control and secure user management - Created dashboards, search, and filtering for easy data management

- Designed responsive UI for both mobile and web platforms
- Technologies: Flutter, Dart, GetX, REST API

340B Program

- Built an app to manage 340B drug pricing program data
- Handled patient, provider, covered entity, covered location, and pharmacy details
- Fetched covered entity info from the HRSA (US Government) API
- Integrated Nexus API to manage the overall data flow
- Synced HRSA data with Nexus for complete information

Vision Magazine App

- Built a news app with real-time data using REST APIs
- Implemented list view and page view for better reading experience
- Added search functionality and pagination for large data
- Displayed HTML content properly inside mobile UI
- Technologies: Flutter, Dart, REST API

Khata App

- Developed a multi-user app for managing credit and debit records
- Implemented role-based login for admin and employees
- Added multi-language support and data filtering
- Designed simple and user-friendly UI
- Technologies: Flutter, Dart, Local Database, REST API
